NON TECHNICAL

- Presentation skill
- Negotiation skill
- Problem Solving skills
- Time Management skill
- Authorized skill
- Willingness to learn skill
- Safety skill
- Team skill
- Writing skill

HOBBIES

INTERNET MARKETING

In my free time, blogging is my favorite to build up my own website that shares all of my knowledge and experience about Routing & Switching, Internet Marketing and build my own "Internet Kingdom" in the near future. Blogging is fun.

JOGGING

I do jogging and physical exercise (2-3 times per week) which I would call my hobby. I like it because it's nice and always makes me feel good afterwards. It's a great way to stay fit and make use of some extra time I have. It's a very common type of sport for many people and it's no wonder because it's basically simple and easy to

start. All I need is some energy, motivation, a pair of sport shoes and trousers that have some flexibility. Also a little extra money in case I would like to go in to some sports center or gym.

MUSICAL INSTRUMENT

Playing guitar and sing songs are my hobbies when I'm travelling or gathering with friends. I'm still learning a classic guitar course for improving. I proud to be member of PHANXICO Musical Encouragement Community which based on district 10 in Saigon, Vietnam
